

Alexa Springs Water Analysis:

Analyte	Criterion	Analysis Result	Pass/Fail
TDS	500 mg/L	140 mg/L	Pass
pH	6.5 - 8.5 mg/L	7.2 mg/L	Pass/Sweet
Magnesium	mg/L	6.2 mg/L	Pass
Calcium	mg/L	4.0 mg/L	Pass
Sodium	mg/L	1.7 mg/L	Pass
Potassium	mg/L	1.1 mg/L	Pass
Zinc	mg/L	.01 mg/L	Pass
Hardness	mg/L as CaCO ₃	1.58 mg/L	Pass/Sweet
Alkalinity	mg/L as CaCO ₃	130 mg/L	Pass
Nitrate as N	10 mg/L as N	<1.0 mg/L	Pass
Fluoride	2.4 mg/L	< 0.01 mg/L	Pass
Cadmium	0.005 mg/L	< 0.0001 mg/L	Pass
Benzene	5 ppB	<.05 ppB	Pass
Dichlorobenzene	600 ppB	<.05 ppB	Pass
Styrene	100 ppB	<.05 ppB	Pass
Toluens	1000 ppB	<.05 ppB	Pass
Xylenes (Total)	10,000 ppB	<.05 ppB	Pass
Coliform Bacteria	1/100mL	0/100 mL	Pass/Pristine

Alexa Springs is a new bottled spring water plant custom built near a true high volume naturally sweet organic spring water source. Every drop of Alexa Springs flows from pristine organic land that is surrounded by the Ouachita National Forest on three sides. The state of Arkansas has black topped the frontage road and improved three bridges for easy TL access. This new plant is located ½ ways between Hot Springs, AR and Mena, AR off of 270 Highway.
